FASCIA, GUTTER & DOWNPIPE

CONTOUR™ FASCIA

The trend setting contemporary style of Contour Fascia will set your home apart from the rest. Its smooth flowing lines and modern curves will accentuate the architecture of your home. The rounded base on Contour Fascia will minimise the risk of micro paint cracking and provides a smooth finish that is complimented by bold crafted stiffening ribs.

Stratco Contour Fascia is manufactured from 0.45mm BMT hi-tensile steel in a full spectrum of colours, that does not warp, knot or crack and designed to comply with the relevant Australian Standards. It is engineered with stronger and deeper stiffening ribs to reduce rippling in the face of the fascia and larger bend radii minimise the risk of micro paint cracking.

Contour Fascia comes complete with a full range of accessories which are designed to continue the smooth form of the fascia around the corners of the house and provide accurate angles that are easy to install.
